Hi Ernie – I realized I didn't send Jakob's headshot. Also attached is our logo in case you can add it into the promo.

Hi Ernie – see attached for the abstract, headshot and bio below. Let me know if you need anything else!

Thanks,

Dori

Jakob Heller, Technical Manager – Wells, Ikon Science

Over the last 17 years, Jakob has worked as a geologist/pore pressure specialist in Denmark, UK, Egypt, Malaysia and the USA. Jakob has been the main technical lead on more than 150 pressure projects globally and has recently been involved in project work in the Gulf of Mexico, offshore Surinam, the Permian Basin and the North Slope, Alaska.

Thanks for reaching out Dori. We would like to get a speaker pic, bio and abstract as soon as possible. We would like to go ahead and post it on our website. We do not need the actual presentation until closer to the date, in fact we can post it after the meeting.

We are still planning for this to be a virtual webinar instead of in person meeting at this time. Thanks again for volunteering to present to our group.

Ernie Prochaska

Hi Ernie,

When do you need the presentation by for the 2/11 webinar? We are planning our 2021 calendar.

Thanks,
Dori

Hi Ernie,

Great, please put us in for that slot! I've copied in our Technical Manager, Jakob, who will be putting together the abstract.

Best,
Dori

Hi Dori,

I am the SPE GCS Drilling Study Group Chair this upcoming season. We have an opening in February on the 11th, 2021 at lunch time if you would like to present at that meeting? Let me know and we will get it booked. At this time we are only doing webinars.

Thanks,

Ernie Prochaska

Subject: [EXTERNAL] SEG GCS - Abstract for Webinar Presenting Opportunity

Hi Everyone,

My name is Dori I manage the Marketing at Ikon Science. I spoke with Susan Howes about having one of Ikon's experts speak at a SEG GCS webinar this year, and she encouraged me to reach out to the appropriate study group teams in order to vet.

I will be sending through an abstract later this week from our Technical Manager that can either fall under the Drilling or Geomechanics study group, as it's loosely based on integrated pre-drill (PG/FG) and real-time.

I wanted to see if either of your groups did indeed have openings coming up for something like this?

All the best,
Dori

Dori Albora
